

# Natural Disasters

Natural Disasters cause untold damage and suffering to people and animals. Read these single line descriptions of situations and name the disaster that has caused it.

24

People are stranded on the roofs of their homes, helplessly watching their belongings flow away.

The Earth is parched and dry, vegetation is withered, people and animals are starving.

A huge black wall-like wave has swept away people and their homes into the ocean.

The hot lava and flying ash have destroyed the village.

Buildings have collapsed and many people have died or are trapped under the debris.

A violent wind has blown away homes and the weather is stormy.
