COMPUTER HARDWARE CROSSWORD

CLUES

Across

- 1 _____ Logic Unit is the component of the CPU that completes math operations.
- 2 ____ - ____ - Execute with 2 down, the CPU cycle.
- 3 Non-volatile main memory that stores essential instructions like boot up and input/output.
- 4 Volatile memory that stores instructions whilst the computer is in use.
- 5 _____ storage is non-volatile storage that is not directly accessible by the CPU.
- 6 A type of main memory that stores frequent instructions.
- 7 The component in the CPU that coordinates other components.

Down

- 1 The physical components of a computer that you can touch.
- 2 ____ - ____ - Execute with 2 across, the CPU cycle.
- 3 Solid ____ storage uses electrical circuits to persistently store data.
- 4 _____ storage uses a laser to read the surface of a disk.
- 5 A very small amount of storage within the CPU for temporarily storing instructions and data.
- 6 Main ____ is directly accessible by the CPU.
- 7 The CPU component that regulates the number of cycles carried out per second.
- 8 The number of processor ____ will effect the performance of the CPU.
- 9 A type of secondary storage where files are stored at a remote location.
