

Fairy Word Problems

Direction: Read the problem sums and decide whether to add/subtract or multiply/divide. Then solve them.

If a fairy has 48 gold coins and gives away 22 of them, how many gold coins does he have left?

A field has 38 shamrocks growing in it. If 17 of them are picked, how many shamrocks are left in the field?

If there are 8 pots of gold at the end of the rainbow, and each pot contains 10 gold coins, how many gold coins are there in total?

A rainbow has 7 colors. If each color has 3 stripes, how many total stripes are there on the rainbow?
