

Multiplication Strategy

Repeated Addition

Repeatedly adding together equal groups of the same number.

Example: $5 + 5 + 5 + 5 + 5 = 25$

5 added 5 times
 $5 \times 5 = 25$

Write a multiplication problem to match the model:

$$8 + 8 + 8 + 8 = 32$$

Draw a model to match the multiplication problem and figure out the answer:

$$9 \times 5 =$$
